

PRINTER, FORM PRINTER, PRINTER CONTROL METHOD AND PRINT CONTROLLER

ABSTRACT

- 15 An impact printer comprising pins for providing an impact and an impact force controller
for changing the force with which the pins impact in accordance with the settings for characters
that are to be printed. A form printer further including a drive unit and control means for
controlling the drive unit is also provided. A method for controlling such a printer, is further
included, which comprises the steps of identifying a character set to be printed and generating pin
20 impact power according to the set.
